

STARSTRAP™ SUBSTITUTES STEEL STRAPPING

As a leading manufacturer of quality tools and equipment for various types of strapping products, FROMM owns three production operations for STAR Strap Polyester strapping worldwide. The facilities are in Kolleda, Germany, in Santiago, Chile and in Bangkok, Thailand

STARstrap™

The New High Performance Polyester Strapping

Polyester strapping are characterized by a very consistent tensile strength and a very high elongation. Characteristics that are most decisive for a safe strapping method. Unlike strapping made from steel, Polyester strapping have a high elongation and absorb shocks and impacts during transportation and handling far better than steel strapping. The excellent elongation features allow the substitution of steel strapping for the same application with a Polyester strap having a lower breaking strength.

The Modern Polyester Strapping System Offers Many Advantages

STAR Strap Polyester strapping offers excellent mechanical features such as high breaking strength, outstanding elongation and perfect tension retaining capabilities

These characteristics result in:

- No damage or contamination of packaged goods (corrosion-resistant).
- High shock absorption in case of impacts during transportation.
- Less pressure on edged of the package.
- Perfect and individual secured packages.
- Strap tension remains tight in cases where package may shrink during storage or transportation
- Substitution of steel strapping by STAR Strap Polyester strapping allows the use of a strap with less breaking strength.
- Reduction of material costs (up to 50 %).
- Less injury risks in case of strapping breakages.
- Easy and clean handling compared to steel strapping.

PP STRAP

Features :

- PP Straps are available in 5, 6, 8, 9, 10, 11, 12, 15, 16 & 18mm width and in white, various colors & Natural too with online Rotogravure printing facilities, giving excellent printing result on the strap.
- They are manufactured through the most sophisticated, hi-tech fully automatic plant giving us an edge over other manufactures.
- They perform smooth and trouble free running on fully automatic machines even at very high speed packing operations.
- Customization of the product with precise & specific requirement is also entertained.

Most Precise winding for hassle-free operation

Gap free flat winding for smooth flow

Embossed design for better aesthetics and slip-free operation

PP BUCKLE/CLIP FOR STRAPPING BAND, SUITABLE FOR LIGHT TO HEAVY PACKING WITHOUT BANDING TOOLS

Key Specifications/Special Features:

- Sizes: 13, 16 and 19mm
- Maximizing cost-effective production by replacing film wrapping
- Neat and clean results Material that is flame-resistant can be offered
