

P403 / P404

Manually operated
plastic strapping tools

Ideal and handy light tools for a wide variety of
standard, vertical and horizontal applications

P403 / P404

Manually operated plastic strapping tools with seal joint

Both models are light-weight devices, suitable for strapping and sealing flat packaged goods (e.g. pallets, bales, crates and packages of all kinds) with plastic strap. They are characterised by reliability, strength, and maintenance-friendliness and can also be used outdoors as portable device. High strap tensions are possible thanks to the tensioning drum. A high joint strength is also guaranteed with special seals and the patented sealing mechanism. With the separate sealing lever the straps are joined in a flash with a single stroke.

Advantages:

- Handy light weight tensioning and sealing tool to strap flat packages using plastic strapping
- A reliable, robust and service-friendly tool
- The windless tensioning system allows very high strap tension
- Special serrated seals and the patented sealing force balance system guarantee a very high seal joint efficiency
- The sealing handle is always operated until it hits the stop - thus the seal efficiency of all joints is high and balanced
