 INDUSTRIAL PACKAGING SOLUTIONS

Our line of quality PVC Shrink films offers endless possibilities for the packaging of retail and wholesale products. From general purpose to speciality, Shrink Films are engineered to perform under the most demanding circumstances.

- Applications for toys, boxes, frames, magazines, chocolates and candy boxes, cosmetics etc.
- Excellent clarity and gloss with tear resistance.
- Suitable for all kind of packaging used for manual, automatic and semi-automatic machines.
- Exceptional sealing characteristics or unbeatable product presentation.
- Films are available in single wound and center-folded.
- Well-balanced shrink performance in low tunnel temperatures and adaptability to the multiple forms of goods.

Shrink Films:

Thickness: 12 to 30 Micron
 Width: 200 mm to 1,000 mm

Fast Facts About POF Shrink Film

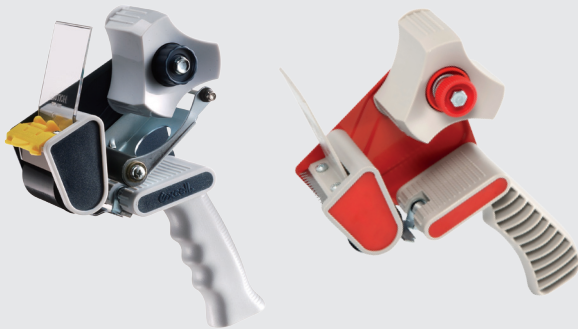

- Made of 100% recyclable materials
- Excellent clarity and glossy shelf appearance; great for consumer products where appearance is critical (toys, games, candies, books, foods, most retail items)
- Ability to shrink quickly and completely (shrinks when heated resulting in a finished good as soon as it comes out of the shrink tunnel)
- Durable, versatile, low cost
- Excellent for bundling multiple items together, like tissue boxes for example.
- Cross-linked POF is great for high-speed applications, providing added strength without compromising clarity and prevents build-up on sealing components
- Polyolefin is more expensive, but more durable- not as effected by temperature changes
- FDA approved for food contact
- Excellent tensile-strength and propagation-to-tear
- Pre-perforated POF is available and allows for even shrink surface, no air pockets

DESSICANT BAG(DRY BAG)

- Silica Gel 20 g
- Silica Gel 50 g
- Silica Gel 100g/pack
- Silica Gel 500 g with hook
- 1kg Bag with Hook

RUST PROTECTION

STRETCH FILMS

Stretch wrapping is a leading method for utilizing, bundling and pallet wrapping of goods. GS packaging provides its customers with different stretch Wrap Packing Solutions.

- Excellent holding forces and puncture resistances for safe transportation.
- Easy handling to ensure reliable and safe packaging.
- Excellent barrier properties and moisture protection of the goods.
- High clarity for product and barcode identification.
- Several qualities available for manual and fully-automatic machine applications.

Stretch Films:

Thickness: 20 to 50 Microns
Width: 450 mm, 500 mm,
750 mm & 1500 mm

FIVE-LAYER POLYETHYLENE CAST STRETCH FILM

It is best suited for use in semi-automatic pallet wrapping machines.

Features:

- Very good stretch capability
- High transparency and clarity
- Strong tear and puncture resistance
- Excellent barrier properties
- Robust five-layer structure

Benefits:

- High value-in-use, most economical cost wrapping
- Easy barcode reading and visual product identification
- Protects goods from mechanical damage during shipping
- Protects goods from moisture, dirt, sand and dust
- Easy application, will not tear in the machine

HR HAND-ROLL CAST STRETCH FILM

Features:

- Good stretch capability
- High transparency and clarity
- Strong tear and puncture resistance
- Excellent barrier properties
- Robust five-layer structure

Benefits:

- High value-in-use, most economical cost wrapping
- Easy barcode reading and visual product identification
- Protects goods from mechanical damage during shipping
- Protects goods from moisture, dirt, sand and dust
- Easy manual application

MINI STRETCH FILM

Benefits:

- Mini stretch film rolls measuring 100mm (width) x 150 metres (length)
- Made from high quality film
- Clings to itself without adhesives for a professional looking wrap
- Residue free, great for bundling small loads or as an alternative to strapping/tape
